

As a dynamic and innovative industry group, we believe our role is to encourage women to enter the innovation and technology industries, to then retain women in these industries and - importantly - enable women to achieve their full potential throughout their careers. As a member of WIT, we invite you to join us in working to promote, develop and sustain women's roles in these exciting and vibrant industries and enjoy the following benefits.

## Knowledge and skills development

Opportunities for professional development include:

- new technologies and their impact
- volunteer project work
- hosting or speaking at events
- participation in development programs
- accessing WIT resources regarding industry trends
- kick-start your career with our mentoring program.

## Networking opportunities

WIT provides a supportive, productive and fun environment in which to meet and network with other women working in all areas of technology, in both the government and the private sector.

## Career opportunities

'Advertise' your skills to potential employers or clients, or access our protégée program and be assigned a mentor who will help you reach your career goals through personal guidance.

## Communicate to members

Use WIT's regular member broadcasts via e-mail, social media and our website to contribute and share stories and information on your industry or organization.

## Business development

Grow your business through access to a large, predominantly female audience from like-minded businesses in the fields of innovation and technology, who are all interested in helping one another to provide quality services.

## Make a difference!

By joining WIT you help ensure that opportunities for women to succeed in the science, information technology, engineering and telecommunications industries are show-cased and demystified. You can even become a mentor and have the satisfaction of helping a protégée reach some of her career goals.
